About Us

BENEVOLENCE TECHNOLOGIES is a leader in Enterprise Information Management (EIM) products services. Our EIM products enable businesses to grow faster, lower operational costs, and reduce information governance and security risks by improving business insight, impact and process speed.

We power digital transformations to empower the intelligent and connected enterprise. Enabling companies to digitize processes and supply chains and discover value in their information with analytics and Artificial Intelligence, BENEVOLENCE TECHNOLOGIES offers greater business insight to make data-driven decisions for success.

We help companies learn and implement the value of digital transformation, thereby giving them the transition on how to operate and execute the digital products.

Why Us

We have a clear vision of enabling the digital world. Our employees help us define and enable the digital future with market-leading enterprise solutions for digital transformation.

We're committed to fostering the best possible work environment for our people in each of our locations across the globe. Team socials, volunteer events, excellent technology and supportive co-workers come together at BENEVOLENCE TECHNOLOGIES to create a winning team.

Also, we have a wide experience dealing with different clients across the globe, different business units, and as the name of our company implies, we are *benevolent* and thrive always to offer the best service to our clients.

The diversity and strength of our workforce are fundamental to our success. People are our greatest strength. We strive to attract and retain the very best talent the industry has to offer.

Security

Every organization should monitor its system for potential unauthorized access and other kind of attacks. It is also important to perform routine checks and create a reliable and safe network in order to safeguard sensitive information. As the risks are many in a business organization, corporations and governments dedicate a substantial chunk of their investment on their computer and network security.

We provide Security Services making use of Security suite that has a complete system dedicated to securing business organization's networks and prevent such organization from risks. Some services that are offered in solving the security needs are:

- Web Application Security Testing
- Mobile Application Security Testing
- Source Code Review
- Secure Configuration Audit
- Network Testing
- Integrating Different Security Solutions
- Penetration Testing
- Encase (an Opentext Security product)
